

***Seventh Symposium Meteorological Observations and Instrumentation***

***Jan 14-18, 1991 New Orleans, LA***

***C. Bruce Baker NOAA/ARL-USEPA***

***Cover Picture of Mobile Flux Platform Instrumentation (boat and aircraft)***

- Ses 1 Atmospheric flux measurements over land
- Ses 2 Atmospheric flux measurements over land
- Ses 3 Radio Acoustic Sounding Systems
- Ses 4 Calibration and Inter-comparison Methods
- Ses 1 Measurements and Instrumentation (P)
- Ses 5 Satellite measurement programs
- Ses 6 Precipitation
- Ses 7 Automated Surface Observing Systems
- Ses 8 Radiosonde Measurements
- Ses 9 Aircraft Measurements
- Ses 10 Radiosonde Systems and Inter-comparisons
- Ses 11 Humidity Instrumentation and Measurements
- Ses 12 Optical Techniques for Determining present Weather and Visibility
- Ses 13 New Instrumentation
- Ses 15 Active and Passive Profilers
- Ses 16 Sodar Comparisons and Applications
- Ses 17 Could Detection by Satellite
- Ses J1 Measurement and Archiving Methods for very long trend monitoring
- Ses J2 Measurements and Experimentation (P)
- Ses J3 Atmospheric BL measurements for the 1990's Scientific needs for BL measurements
- Ses J4 Special Sess on Laser Atmospheric Studies Air Pollution (P)
- Ses J14 Lidar Global Back-scatter Experiment (GLOBE)
